

Bathroom Collection

BY COSENTINO®

Bathroom Collection

BY COSENTINO®

Bathroom Collection by Cosentino is a unique concept in the architectural sector, based on the use of single materials that offer superior performance and remarkable beauty.

The first of these, Silestone®, is a surface made with up to 90%* of quartz with bacteriostatic protection available in some colours and a range of more than 80 exclusive colours.

The second, Dekton, is a revolutionary ultra-compact surface with high resistance, durability and versatility of design and texture. Both are large-format products manufactured exclusively by Cosentino®.

The aim of this concept is to offer architects one of the most exclusive ranges for walls and cladding with the widest choice in colours and textures. It also offers a new line in design of wash basins and shower trays made to order, based on the needs of each customer.

Silestone® Natural Quartz Surfaces

Silestone® is the best selling natural quartz surface in the world. This is not just by chance. Silestone is used both on floors as well as on kitchen and bath walls, with as few joints as possible.

Silestone® - life is greater as it is filled with color and textures. An endless range of proposals with physical and chemical properties that are the result of constant research for many years.

Silestone is an almost unbreakable surface. It is stain-free, mark-free and scratch-free. The resistant pieces of Silestone are alive and continue to be enjoyed over time, going beyond the surface.

With a very low absorption index and a minimal number of joints, liquids are welcome in the heart of the bathroom, but not inside Silestone.

JUMBO	STANDARD
3270 mm x 1590 mm	3060 mm x 1400 mm

ECO Line Colour Series

by Silestone®

ECO Line Colour Series is our quest for sustainability. We gather the waste materials that we are all surrounded by to create a product with a composition of 75% recycled materials. Glass, porcelain, vitrified ashes and even water are reused to breathe new life into something that had previously expired.

The remaining 25% are natural materials and a resin of plant origin.

Dekton® Ultra-Compact Surfaces

Dekton® is a sophisticated combination of raw materials used to make glass, next-generation porcelains and quartz surfaces, based on an exclusive technological process (TSP) which produces an accelerated version of the metamorphic changes suffered by natural stone after being exposed to high pressures and temperatures for thousands of years.

Dekton® is pressed using a 25,000-ton press which converts the slab into a large format, extremely resistant, ultra-compact surface.

Dekton® TSP

Sinterised Particle Technology

TSP technology emulates in a few hours what nature takes thousands of years to do, through an exclusive technological process.

TSP is a process that performs sintering on mineral particles so that they link up and change

The electron microscope can appreciate the reduced porosity of the material, due to the sintering process and exclusive ultra-compactness of Dekton®. Its zero porosity and the non-existence of the microflaws that cause tension and weaknesses set Dekton® apart from other materials.

DEKTON® ULTRA SIZE

Ultra-compact surfaces

Thanks to the size and the lightness of Dekton (3200 x 1440mm), the design possibilities for kitchens, bathrooms, façades, walls or high transit floors are growing exponentially.

Dekton® Beyond Surfaces

Thanks to the manufacturing technology used to make Dekton®, colours and textures with varied characteristics can be obtained, from solids with outstanding purity and chromatic homogeneity and materials with veins and movements that have a very natural appearance, to bolder colour ranges or products for environments that require a more industrial appearance.

Dekton® Advantages

- CUSTOM DESIGN
- LARGE FORMAT
- WIDE RANGE OF COLOURS
- STAIN-RESISTANT
- ABRASION-RESISTANT
- HIGHLY SCRATCH-RESISTANT
- DIFFERENT TEXTURES
- HIGH MECHANICAL RESISTANCE
- REDUCED WATER ABSORPTION
- HIGH RESISTANCE TO HYDROLYSIS
- COLOUR STABILITY
- DIMENSIONAL STABILITY
- MAXIMUM RESISTANCE TO FIRE AND HEAT
- FIREPROOF MATERIAL

ULTRA MATT

Polished finish for wash-hand basins

*There is no vein continuity in different planes of washbasins.

ULTRA TEXTURE

Textured finish for wash-hand basins

* There is no vein continuity in different planes of washbasins.

Large Format

One of the characteristics that makes the Bath Collection by Cosentino concept unique is its large format.

All the Cosentino® materials are manufactured in slab formats of more than 3 metres long by more than 1.4 wide. This enables us to cover the bathroom area with the smallest possible number of pieces, thereby obtaining greater continuity in design and better hygiene, due to the smaller number of joints.

Thanks to this extra-large slab format, it is not difficult to make XXL tiles for wash-hand basins, shower trays or floors and walls.

Silestone® Applications

- Ⓐ CUSTOM LARGE FORMAT APPLICATIONS
- Ⓑ FLOORING
- Ⓒ PANELLING
- Ⓓ WASH-HAND BASIN
- Ⓔ SHOWER TRAYS

Dekton® Applications

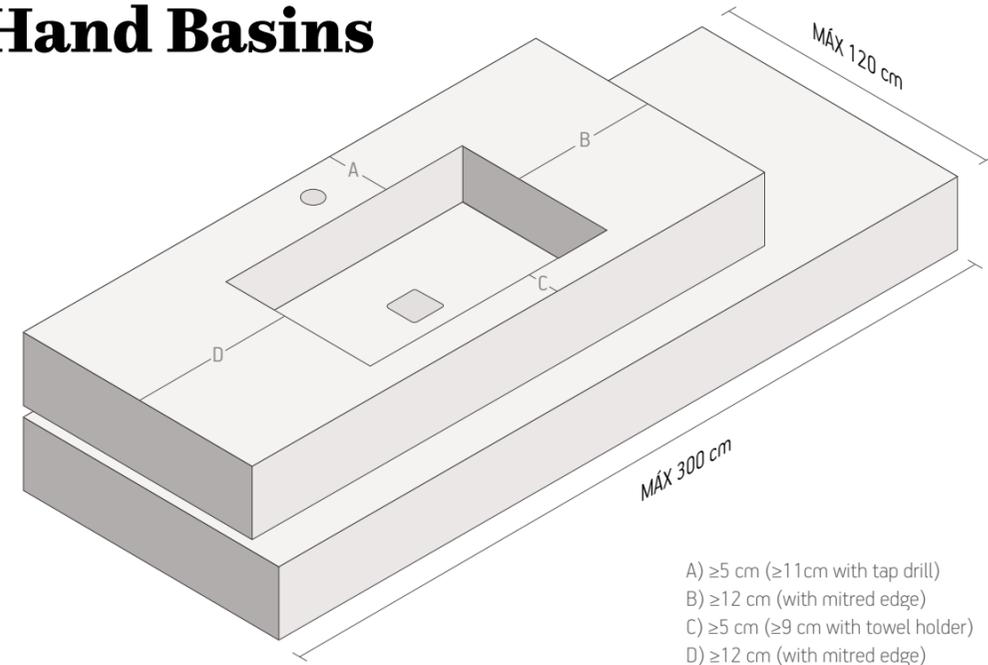

- Ⓐ CUSTOM LARGE FORMAT APPLICATIONS
- Ⓑ FLOORING
- Ⓒ PANELLING
- Ⓓ WASH-HAND BASIN

A: Basic Wash-hand basin - Silestone® White Storm / B: Dekton® - Borea

Custom Wash-Hand Basins

- A) ≥ 5 cm (≥ 11 cm with tap drill)
- B) ≥ 12 cm (with mitred edge)
- C) ≥ 5 cm (≥ 9 cm with towel holder)
- D) ≥ 12 cm (with mitred edge)

* Installation brackets are not included in sinks of less than 45 cm wide.

Custom Design

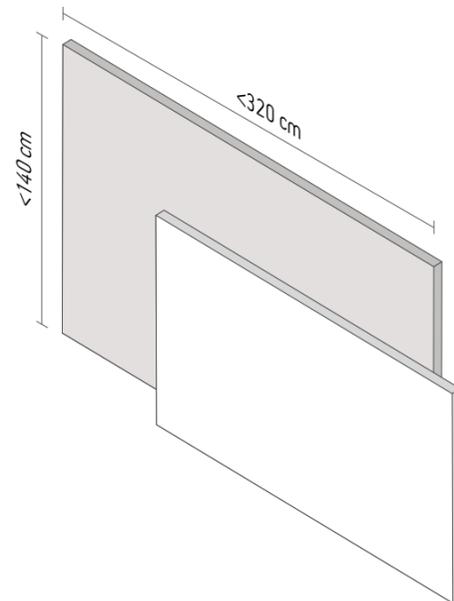

The entire Bathroom Collection is custom-made to order, in any of the 80 Silestone, Eco Line Colour Series or Dekton* colours, in accordance with the taste of each client.

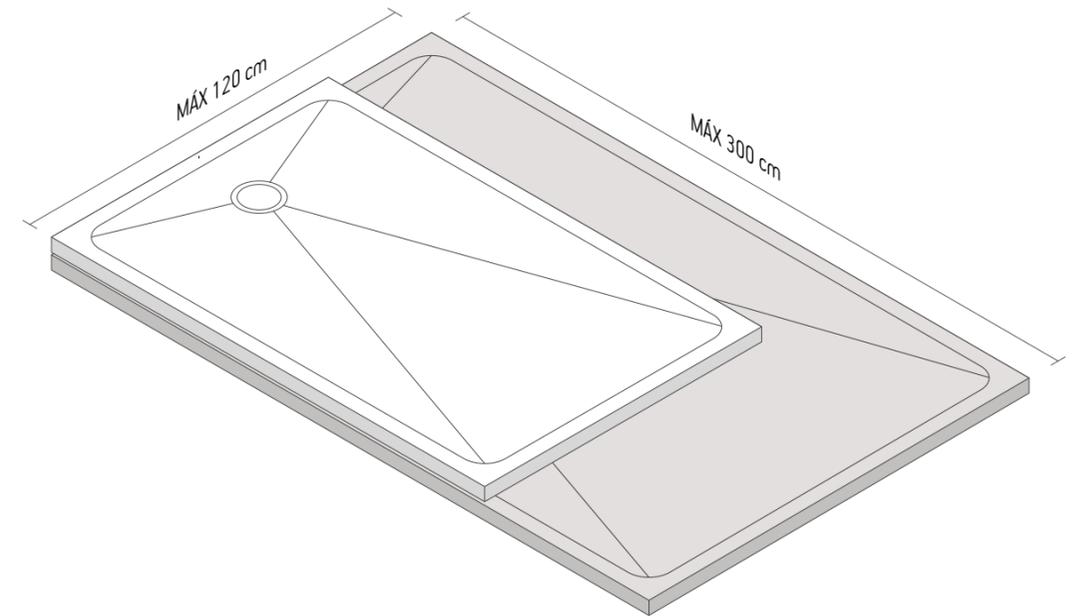

The product is adapted to the space and needs of each client.

Thanks to its large format production, Cosentino® can make unique jointless tiles in lengths of more than 3 metres and widths of more than 1.5 metres. For wash-hand basins, shower trays, panelling or bathroom floors.

For large format shower trays, it is recommended to include a drying area with no gradient to guarantee a good water evacuation. The drying area is an independent piece from the gradient area.

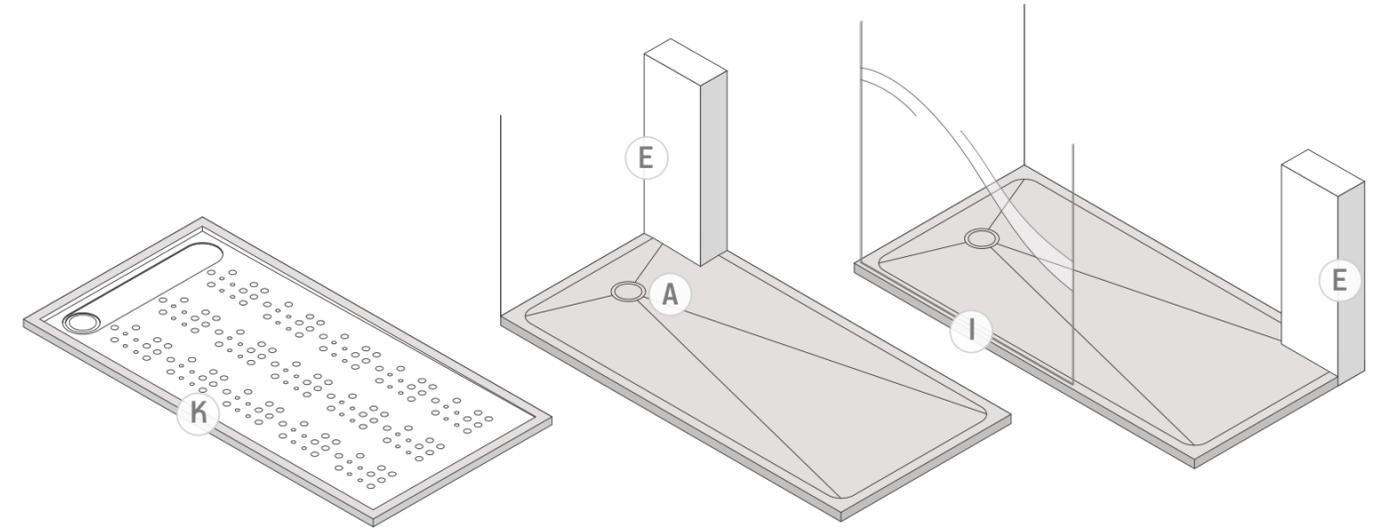

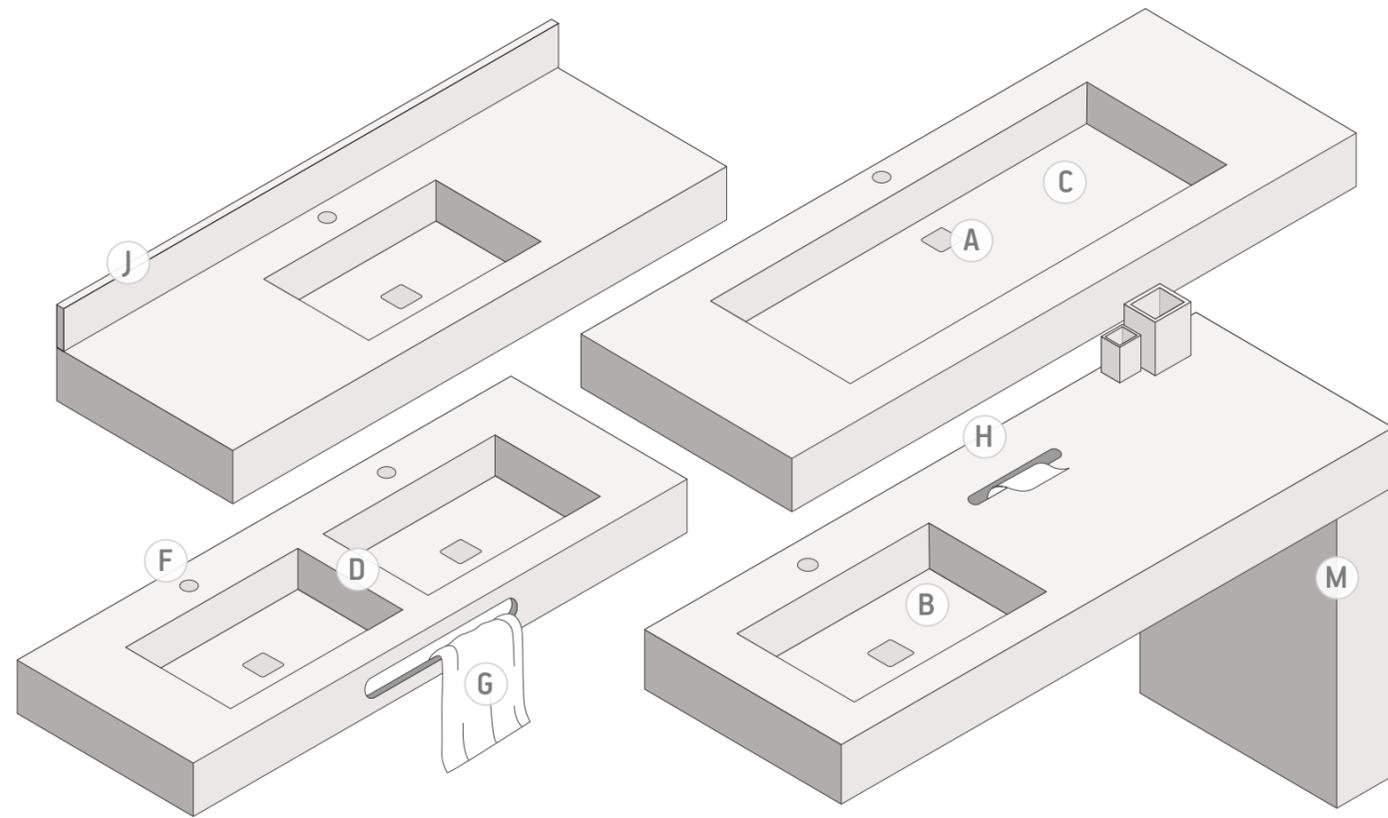

Custom Shower Trays

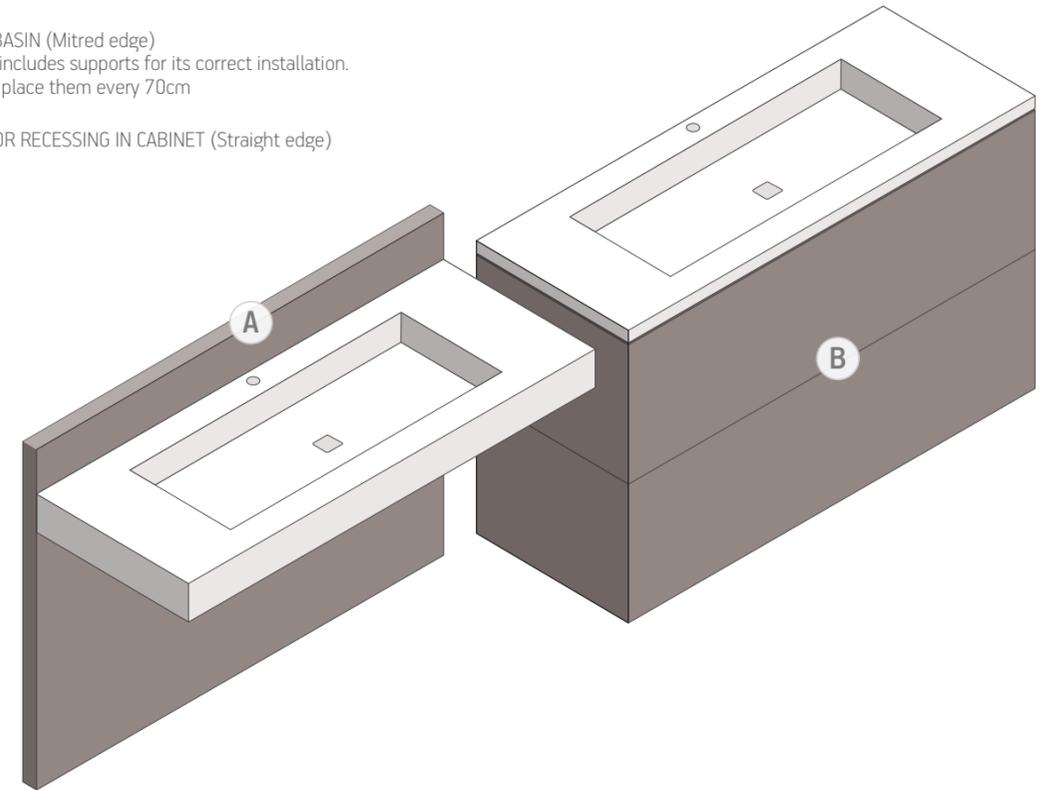

Custom Design Operations Available

- A** Changeable in shower and wash-hand basin valve position
- B** Changeable in basin position
- C** Change in basin measurements - Minimum 20 units
- D** Additional basins
- E** Cutting to adapt the product to the space, columns or other special architectural features
- F** Openings for sanitary fittings, boxes, special bevels, etc. In different positions.
- G** Tower holder at the front of the wash-hand basin
Standard Measures:
Small: 400 x 70mm
Medium 600 x 70mm
Large 800 x 70mm
- H** Slot for paper towel box in wash-hand basin
- I** Slot in shower tray for installing glass screen
- J** Customised coping
- K** Perimeter frame with a width of 4cm for supporting the screen
- L** "Ad-hoc" designs, completely new, with illustration and client instructions - Minimum 50 units
- M** Lateral support strut. Maximum size: 900 x 600 x 160 mm

- A** MURAL WASH-HAND BASIN (Mitred edge)
The wash-hand basin includes supports for its correct installation. It is recommended to place them every 70cm
- B** WASH-HAND BASIN FOR RECESSING IN CABINET (Straight edge)

Design & Innovation

Cosentino® offers architects and designers a wide range of wash-hand basins and shower trays, placing special emphasis on distinction and exclusivity.

Architects and Designers are also invited to contribute with their experience and creativity to improve and enrich the collection with new projects and designs, which Cosentino is able to make real, thanks to its development and industrialisation capacity.

Colour & Harmony

Colour and texture take on greater importance, through exclusive materials such as Silestone® and Dekton, which can be designed to mimic natural wood and stone and natural stone with coatings applied in modern architecture, such as oxides or microcement.
